Book by Book: Galations. Color. 101 MINS mins. Video Released Jun. 2003. The Apostle Paul wrote the book of Galatians to explain how trusting in Christ gives us true freedom - freedom from legalism and freedom from sin. He sets forth his argument against trusting in the Law itself for salvation: the Law taught that salvation would come from the Messiah alone. Paul presents examples from the Old Testament that help us understand the eternal gospel and how the temporary period of the Law pointed to faith in the same gospel. After explaining our total freedom in Christ, Paul goes on to tell us what this freedom means in practical terms. The six programs cover the six chapters of Galatians as follows:1. Paul, and Apostle of God's Gospel (ch.1)2. Peter, an Apostle to the Jews (ch. 2)3. Abraham, The Man of Faith (ch. 3:1-25)4. Sarah, Mother of the Free (ch. 3:26-4:31)5. Book by Book: Psalms. Color. 101 MINS mins. Video Released May 2003. The book of Psalms is constructed and arranged in a brilliant way, and the sequence of Psalms covered in these programs is one of the most fascinating in the entire book. From Psalm 20 we are approaching the death of the Messiah, set out so powerfully in Psalm 22. We are taken through the Resurrection in Psalm 23 and the Ascension in Psalm 24. Psalm 25 expresses the sinner's confidence in the ascended Messiah, then from Psalm 26-31 we listen in to the Messiah's great prayers in His suffering. These are precious Psalms because we are listening to the only One who can really teach us to pray. The six programs covers selected chapters of Psalms as follows:1. Psalm 20- The LORD Saves His Anointed2. Psalm 22 - The Psalm of the Cross3. Psalm 23 - The Psalm of Resurrection Hope4. Psalm 24 - The Psalm of the Ascension5. Psalm 25 - In You I Trust, O My God6. Breathing & Respiration. Science-Zoology. Science-Anatomy And Physiology. Color. 10 mins. (Mechanics of Life Ser.). (YA). Virtually all life on earth is based on the oxidation of carbon compounds during the process of respiration. One of the products of oxidation is the gas carbon dioxide. Living organisms must take in oxygen & eliminate carbon dioxide. Single celled organisms, like an amoeba, can extract oxygen directly from the water surrounding them, through an outer permeable membrane; carbon dioxide is eliminated in the same way. They can do this since their outer surface area is great, relative to their volume. With large animals, however, more complex machanisms are needed to extract oxygen from air or water. Bridges to Independence: Guided Reading with Nonfiction, 4 VHS cassettes. Color. 120 min mins. (C). (gr. k-3). Video Released Jan. 2006. Author Tony Stead. Guided reading has long been recognized as a dynamic process that supports children's skills as readers in all genres, yet fiction accounts for over ninety percent of the texts we select for these small-group encounters. If children are to be empowered, life-long readers, who read for many different purposes, they need concentrated, small-group encounters with informational texts.In this series, Tony Stead works with third-grade teacher Lisa Elias Moynihan and first-grade teacher Lauren Benjamin to explore guided reading instruction with early emergent, developing, and fluent readers, using a variety of informational texts. After an introduction, three in-depth programs look at what happens before, during, and after the reading?accessing students' prior knowledge; overcoming text challenges; introducing the focus of the lesson; sharing and reflecting and, most importantly, determining if the students have understood what they read.Program 1: Getting StartedAn introduction to key issues for ensuring successful guided reading sessions: forming groups using assessments, selecting the focus and text, and managing the rest of the class.Program 2: Guided Reading with Early Emergent ReadersLauren and Tony each conduct guided reading sessions with young learners, focusing on the importance of making children aware of what they are learning about the world as they read.Program 3: Guided Reading with Developing ReadersThe importance of using procedural texts in guided reading is highlighted as Tony and a group of children read through How to Make a Paper Airplane. Will the children be able to follow the instructions and make a plane that can fly?Program 4: Guided Reading with Fluent ReadersWe watch as Lisa Elias Moynihan works with her fluent third-grade readers using a biography and then reconvenes the group a few days later to follow-up. Memorable footage of detention centers & sentencing hearings offer a real-life glimpse into the legal system that punishes drug offenders. Among the eye-opening facts revealed in this program: a person can be convicted of aiding & abetting a felony just for spending time with a known drug dealer; a person can be convicted of drug trafficking for merely referring customers to a seller; giving a party where others sell or use drugs can result in criminal prosecution for the home owners, even if they were not present! Cancer Psychology: An Interview with Dr. Lawrence Leshan, 1 Color. 25 mins. NR. (Narrated: English). Video Released Sep. 2002. Author Lawrence LeShan. Interviewed By David Bognar. Produced by David Bognar. Dr. Lawrence LeShan is the pioneer of psychological intervention for cancer. He is a psychologist who first began working with terminal cancer patients using classic Freudian techniques and learned that the traditional psychotherapeutic approach (searching for pathology and its' roots) was ineffective. His own research revealed that a majority of his clients had lost their enthusiasm for life, prior to contracting cancer. Aware of it, or not, they no longer believed they would be able to achieve the kind of satisfying life they desired. LeShan developed a new approach. It entails helping a person search for what would be a zestful and enthusiastic life; as he calls it, to "find their song." With this form of therapy, a majority of his terminal clients went into remission or their cancer resolved. Remarkable, but not unscientific according to LeShan. To him, and those that practice this form of therapy, it is mostly a matter of relieving stress on the immune system, and allowing the immune system to improve its' ability to heal. He emphatically states that it is not a matter of people creating their own reality. He says he has known people who have not wanted to live very much, but no one who wanted to die. He is critical of therapists who leave their clients feeling guilty and feeling that they were in some way responsible for their cancer. Skilled professionals, he maintains, do not have this as a problem.In this interview, LeShan gives a comprehensive review of this therapy, it?s origins, mechanics and practical application. Lawrence LeShan is clearly one of the grand masters of psychology. He has developed a sensible, satisfying, and effective complementary cancer therapy that is a must for those wishing to help those with cancer survive. New Way. VHS. There he encountered so much hardship it is amazing he didn?t abandon his mission and go home. But he stayed for over 40 years.One issue that tormented him was sati?the burning alive of widows when their husbands died. He would not rest until this practice was stopped. Facing insurmountable odds, he ?plodded? on to influence the abolition of sati and to become the revered ?Friend of India? and ?Father of Modern Missions.?He oversaw more translations of the Bible than had been done in all previous Christian history combined. Life was never easy for Carey. But he simply refused to quit, even when a devastating fire destroyed years of his literary work.
